Natural Resource Ecology—WIS 3404
3 Credits, Fall Semester 2023, University of Florida
Course Syllabus

Instructor/TA contacts: Dr. Steve A. Johnson (he/him/his): tadpole@ufl.edu; Office—352.846.0557
Grad Teaching Assistant: Dave Klinges (he/him/his) dklinges@ufl.edu
We will do our best to respond to all emails within 24 hours.

Office hours: Dr. J: Newins-Ziegler Hall Room 216; Tuesdays 9AM-noon in person via phone, Zoom, or Skype (please make an appointment). Email any time, within Canvas only.

Mr. Dave Klinges: Email him in Canvas with questions or to arrange an appointment to meet with him.

Course prereqs: General Biology (BSC 2011 or equivalent course) or permission of instructor

Course schedule: Flexible: this is an asynchronous, online course and you will work at your own pace to some extent. However, it is your responsibility to keep up with course assignments and meet posted deadlines for quizzes, exams, and assignments. There are no scheduled class meeting times.

Course format: This is an online course, and you will access course materials, take quizzes and exams, turn in assignments, and communicate with Dr. J via e-Learning in Canvas, UF’s online course management system. The course name in Canvas is “Natural Resource Ecology Fall 2023.” Please be sure to visit the course Canvas site ASAP and view the Welcome Video at course home page to learn how the course is organized in Canvas. Also study this syllabus, and the course calendar posted Canvas—a PDF of this syllabus is available at the course Canvas site. Regularly visit the course Canvas site for important course announcements and be sure the check your Canvas email daily.

Canvas website: Course materials (e.g., quizzes, exams, various assignments, lectures, etc.) and announcements will be posted at the Canvas site for the course. As a UF student registered for the class you should have access to this the course “Natural Resource Ecology Fall 2023.”. You will need your Gatorlink username and password to log into Canvas at elearning.ufl.edu (click the orange “LOG IN TO E-LEARNING” button).

Required course text: To complete this course you need to purchase the digital resources for the Oxford Insight package (ISBN 9780197673737) associated with the course. This package provides you access to each chapter of the text
via an eBook (Ecology 6th Ed. (2024) W.D. Bowman and S.D. Hacker, Oxford University Press) and each chapter’s associated resources. You will need to complete simulations within several of the chapters’ Hands-On Problem sections for your Problem Set assignments, which you will submit in Canvas. There are also practice tests at the end of each chapter that you can take to prepare for the graded quizzes that you must complete in Canvas. And be sure to explore the other resources available through Oxford Insight.

**Oxford Insight website:** As noted above, you must purchase access to the Oxford Insight package for the course.

You have two options to purchase the course Oxford Insight package: **Option 1** is through the All Access program operated by the UF Bookstore. The program offers UF students easy access to digital course materials for select courses at the lowest price. Learn more about UF’s All Access program. The charge for this option is billed automatically to your UF student account. **Option 2** is to purchase the Oxford Insight package directly from the publisher, Oxford University Press. The cost for this option is $88.99 and you will have to pay with a credit card. You can purchase directly from the publisher here.

Regardless, of how you purchase the Oxford Insight package for the course, you will need to access the specific package for my course. The Registration Code for my Oxford Insight package is https://oup.junction.app/#/register/647df38ac49f9f739b13a50b and the Course Enrollment Code 11330d.

At the course Home page in Canvas (under Start Here) there are links with guidance on how to purchase your access code and register at the Oxford Insight platform. There is also a link with directions on how to “opt-in” to my course via the UF Bookstore’s All Access program.

**Additional requirements:** Since this is an online course, you need a working knowledge of computers and some commonly used programs (e.g., MS Word, Excel). Obviously, you will need a computer and a reliable internet connection. You will also need to become very familiar with the e-Learning in Canvas system. Visit https://elearning.ufl.edu/e-learning-basics/uf-e-learning-faqs/ to view FAQs about using e-Learning at UF and the Canvas system in particular. Also please visit the Student Help page for e-learning at UF: https://elearning.ufl.edu/student-help/

Web browsers: UF e-Learning in Canvas supports the last two versions of most every browser release. Recently, Canvas has stopped supporting Internet Explorer 11. As a result, users are unable to access Canvas on this browser and will need to use a different supported...
Some supported browsers may still produce a banner stating "Your browser does not meet the minimum requirements for Canvas." If you have upgraded your browser but still see the warning banner, try logging out of Canvas and deleting your browser cookies. Please contact the UF Computing Help Desk at 352-392-4357 or via e-mail at helpdesk@ufl.edu if you need assistance.

UF course catalog description: Application of ecological principles and natural history information to conserve and sustainably manage natural resources with an emphasis on animals and plants.

Course description in more detail: The course describes how ecological concepts and processes are applied at various scales to conserve and manage renewable natural resources (e.g., plants, animals, water, soil) in terrestrial and aquatic systems—it explains how ecological science is applied to help solve real-world problems. In most cases, these problems are caused by the actions of people, and the course emphasizes potential conservation and management strategies to mitigate anthropogenic issues such as, but not limited to, habitat fragmentation, invasive species, disease, and climate change.

The course focuses on interactions within and among species and how they are affected by their abiotic environment. It explores numerous biological principles (e.g., nutrient and water cycles, population growth, symbioses, biodiversity, etc.) and emphasizes how these principles are applied to effectively manage natural resources. The course also provides a broad foundation of important ecological principles while emphasizing how ecological phenomena in terrestrial and aquatic systems are influenced by the actions of humans—natural resource examples are used to illustrate key ideas and concepts. This course uses case studies to illustrate the application of ecological principles to conserve and manage natural resources.

Information delivery consists of recorded lectures, web-based learning activities, problem sets, and textbook readings. Text readings provide a broad foundation of general ecological principles, whereas recorded lectures emphasize and explain the application of ecological principles to conservation and management of natural resources. There is no lab associated with the course.

Fundamental Goals and Learning Objectives: The general goals and major learning outcomes for the course are listed below. Specific learning objectives are provided for each lecture. Review the ‘Summary’ boxes at the end of each text chapter for important concepts that students should understand.

- Explain how different ecological principles are applied to solve specific problems affecting the conservation and management of natural resources at different spatial and temporal scales
• Understand and define the concept of biodiversity, describe ecological and socioeconomic values of biodiversity, and make science-based arguments as to why biodiversity should be conserved

• Describe how and why natural systems are organized at scales ranging from biome to population and provide examples

• Explain how biotic and abiotic factors affect the abundance and distribution of plants and animals and understand how organisms adapt and evolve in response to changing environments; analyze the role of climate change in this context and discuss strategies for mitigating negative effects of climate change on renewable resources

• Understand and define basic interactions within and among species (e.g., competition, predation, symbioses), and explain how these interactions can be manipulated to manage populations of plants and animals to meet specific objectives

• Explain energy flow through food webs, and nutrient (e.g., carbon) and water cycles and how the flow of energy is affected by the actions of humans

Assessments:
Quizzes: There are 14 quizzes in this course. The first quiz is to ensure you are familiar with the syllabus and the course calendar (Quiz 1 Syllabus Quiz). The other 13 quizzes cover information presented in the book chapters—these quizzes must be completed weekly by 10:00 P.M. on Thursdays. Questions for the quizzes (except for the Syllabus Quiz) are based exclusively on the text chapter readings that are assigned each week (many questions emphasize detailed information). See the “Course Lecture and Reading Schedule” below and the module pages in Canvas for each week’s text reading assignments. The number of chapters covered by a particular quiz varies from 1-3, depending on the assigned chapter readings in a week. Read the chapters before you attempt the quizzes! Be sure to read all the information in each chapter: chapter case study, chapter introduction, and each of the chapter sections, and the chapter review. It’s a good idea to take the Chapter Test at the end of each chapter as practice before you take the graded quizzes in Canvas for a grade. The Chapter Tests at the end of each chapter at the course digital resources site do not count toward your grade—these are practice tests and they are optional. Again, the questions associated with each Chapter Test within the Oxford Insight platform are NOT the same as the course quizzes you take in Canvas.

You must take the quizzes online in Canvas! Quiz questions are multiple choice and true/false. To help you master the material presented in the text, you have the option of taking each quiz up to four times. Questions are randomly drawn from a larger pool by the Canvas system. Each quiz has five questions from each text chapter assigned that week. Quizzes are timed, and the time allotted for each quiz is proportional to the number of chapters covered by a quiz—5 minutes per chapter. Once you start a quiz in Canvas you must finish it in the allotted time—the “clock keeps ticking” in Canvas as soon as you open a quiz and only stops after the allotted time has passed. Your official quiz score is your best score on any single quiz, assuming you take a quiz more than once. Weekly quizzes (including the Syllabus Quiz) are worth a total of 145 points (each question is worth 1 point). All the quizzes for each module of the course will be available on the date that module opens in Canvas, but they close at different times. Quizzes must be completed before their
closing date and time. Consult the Critical Dates & Deadlines table below for a list of open/due dates and times for quizzes. To “make-up” a quiz, students must provide a legitimate, documented excuse for not completing the quiz on time. Access quizzes at the Module page in Canvas—you should see links to quizzes on the Module overview page and under the Assessments heading within each Module page.

**Exams:** There are three exams in this course; the first covers material assigned for Modules 1-2, the second exam is on material assigned for Modules 3-4, and the third exam covers material for Modules 5-6 (exams are not cumulative). Exam questions cover material presented in recorded lectures (see View Presentation headings for each Module page in Canvas). Exam questions are multiple choice and true/false. Like quizzes, exams are administered in Canvas, and they are timed. Unlike quizzes however, you may only take each exam ONCE. Each exam is worth 100 points. Each exam will only be open in Canvas for a limited time on specific dates. Consult the Critical Dates & Deadlines table below for a list of open/due dates and times for exams. To “make-up” an exam, students must provide a legitimate, documented excuse for not completing the exam on time. Access exams via the Modules pages in Canvas—you should see links to exams on the Module overview page and under the Assessments heading within each Module page.

**Problem Sets:** There are four Problem Sets assigned for this course. Consult the Critical Dates & Deadlines table below and the Problem Set assignment sheets for a list of open/due dates and times for these assignments. Information for completing the Problem Sets is outlined in the assignment sheets (PDF files) that you download at the Canvas site. On the Module pages these assignments are listed under the Assessments heading at the bottom of the page. Most of the Problem Sets must be completed by visiting the course text website. Each Problem Set is worth 50 points, regardless of the number of questions, for a total of 200 points. Values for individual questions are adjusted accordingly, depending on the total number of questions for each Problem Set. Late Problems Sets are not accepted without a legitimate, documented excuse. **Please do not wait until the last minute to complete and submit Problem Sets** to avoid technical glitches that might delay your ability to upload the assignment on time. Access Problem Sets via the Modules link in Canvas—you should see links to Problem Sets on the Module overview page and under the Assessments heading within each Module page.

**Online Learning Activities:** The ‘OLA’ sheets contain lists of links for a variety of information sources that will allow you to further explore topics within each module. You are strongly encouraged to explore these, but that is not a requirement. This is your chance to dig a bit deeper on a specific topic—you will learn more by doing this, so please make some time to check out the resources on the ‘OLA’ sheets. If you find that a link no longer works or have a suggestion for additional resources that could be added, please email Dr. J in Canvas.

**Points and Final Grade:**

<table>
<thead>
<tr>
<th>Points</th>
<th>Final Grade</th>
</tr>
</thead>
<tbody>
<tr>
<td>Quizzes (14)</td>
<td>145 pts.</td>
</tr>
<tr>
<td>Exams (3)</td>
<td>300 pts.</td>
</tr>
<tr>
<td>Problem Sets (4)</td>
<td>200 pts.</td>
</tr>
<tr>
<td><strong>Total</strong></td>
<td><strong>645 pts.</strong></td>
</tr>
</tbody>
</table>

Grades: **A** (90%+), **B** (80 - 89.9%), **C** (70 – 79.9%), **D** (60 – 69.9%), **E** (<60%)

Scores are not ‘curved’.

| **Module 1: Aug. 23 to Oct. 3**  
Assignments & Quizzes/Exams  
- Quiz 1 Syllabus, Quizzes 2-3  
- Problem Set 1: see assignment sheet posted in Canvas |
| 1 Aug. 23 | **Case Study Lecture:** Course Introduction  
**Online Learning Activities:** Activities emphasize ecological connections and focus on amphibian declines and malformations.  
**Text Reading Topics:** Ecological Connections | Chapter 1  
**Web of Life** |
| 2 Aug. 28 | **Case Study Lecture:** Climate Change Impacts on Future Biome Distribution  
**Online Learning Activities:** Interactive web pages allow exploration of our planet’s major biomes as well as numerous research sites in the US that are part of the LTER network  
**Text Reading Topics:** Climate and Biomes | Chapters 2 & 3  
**Physical Env. Biosphere** |
| 3 Sept. 4 | **Case Study Lecture:** Thermal Effects on Pythons in Florida  
**Online Learning Activities:** Activities offer a look at the fundamental processes that affect Earth’s climate, provide specific examples of how animals deal with extremes in temperature, and more  
**Text Reading Topics:** Coping with Environmental Variation | Chapters 4 & 5  
**Env. Var.-Temp. & Water**  
**Env. Var.-Energy** |
| **Module 2—Ecosystems** |
| **Module 2: Sept. 11 to Oct. 3**  
Assignments & Quizzes/Exams  
- Quizzes 4-6, Exam 1  
- Problem Set 2: see assignment sheet posted in Canvas |
| 4 Sept. 11 | **Case Study Lecture:** Hydrothermal and Seep Vent Community Structure  
**Online Learning Activities:** Video clips explore the unique organisms of deep-sea hydrothermal vent communities and the response of global plant growth to climate change  
**Text Reading Topics:** Primary and Secondary Production | Chapter 20  
**Production** |
| 5 Sep. 18 | **Case Study Lecture:** Brown Treesnake Trophic Cascades  
**Online Learning Activities:** Videos and simulations emphasize the complex relationships among species in trophic cascades  
**Text Reading Topics:** Food Webs, Energy Flow | Chapter 21  
**Energy Flow & Food Webs** |

Getting help with technology:
For IT help regarding issues with the course involving the Canvas site, first check the student Help Desk Canva FAQs [https://elearning.ufl.edu/student-help/student-help-faqs/](https://elearning.ufl.edu/student-help/student-help-faqs/). You can also get to this page by clicking the “Student Help” link in the blue at the top of the Canvas log in page [https://elearning.ufl.edu](https://elearning.ufl.edu). Within Canvas you can also get help by clicking the “Help” icon in lower left of the blue Canvas header. If you still need assistance after exploring the sites listed above, contact the UF Computing Help Desk (352-392-4357, helpdesk@ufl.edu).

Frequently Asked Questions

1. **How do I access the online learning management system used for this course?**

   This course is delivered in the Canvas learning management system. You will need a Gatorlink account to log on to e-Learning in Canvas. To log on to UF’s e-Learning in Canvas site, go to [http://lss.at.ufl.edu/](http://lss.at.ufl.edu/) and click on the orange “Log In To e-Learning” at the right of the page; you may be prompted to enter your Gatorlink username and password. Once you have entered your Gatorlink username and password your Canvas page will load, and all the Canvas courses you are registered for will be available to you via your Dashboard. This course will appear as **Natural Resource Ecology Fall 2023**. If you are new to Canvas, please check out the Quickstart Guide for Students: [https://elearning.ufl.edu/student-help/keep-learning/quickstart-guide-for-students/](https://elearning.ufl.edu/student-help/keep-learning/quickstart-guide-for-students/)

2. **Where do I get the required text and instructional materials for this course?**

   The required course text, which you will need the first week of class, can be acquired in a variety of ways. See the “Required course text” heading on the first page of this syllabus for details. Supplemental readings and all other materials will be available as PDFs at the course Canvas site.

3. **Do I have to have Internet access at home?**

   No, but you are strongly encouraged to have reliable Internet access at home. The University also has many student computer labs available to students who wish to use them and wifi is available across campus.

4. **What computer programs will I need to use in this course?**

   **Adobe Acrobat** reader is free software required to view and print course materials that are available in Canvas as PDF files. To download the free reader, go to [http://get.adobe.com/reader/](http://get.adobe.com/reader/).

   **e-Learning in Canvas** is the centrally-supported course management system at UF. It is the online source for the learning resources and assignments in this course. For a list of FAQs regarding e-Learning in Canvas, go to [https://elearning.ufl.edu/student-help/student-help-faqs/](https://elearning.ufl.edu/student-help/student-help-faqs/).

   **Data Manipulation** is important for organizing, visualizing, and presenting scientific data. One of the easiest ways to do this is with a spreadsheet and the functions available in a spreadsheet program such as Microsoft Excel. You will need to ability to organize and present data in tables and graphs to complete Problem Sets in this course.

   A **Web Browser** is essential and Canvas supports most browsers. However, it is HIGHLY RECOMMENDED that you use the most recent version of the browser.

   **Java** is required to view and complete the simulations at the course text website, which are required for most of the Problem Sets. You can download Java free at [http://www.java.com/en/](http://www.java.com/en/)

5. **Where do I get help with computer problems and other technical help?**

   If you have a question or problem using technology required for this course, including using Canvas, here are the steps you should take.
2. Email the UF Help Desk helpdesk@ufl.edu
3. Call the UF Help Desk [352-392-HELP (4357) call the Help Desk for urgent questions]
4. Email the course instructor in Canvas

The UF Computing Help Desk is available by phone or email at: (352) 392-HELP (4357) and helpdesk@ufl.edu 24 hours a day. They are also open at the HUB for walk-ins M-F from 8AM-10PM and S-S from 8AM-5PM. Before calling the UF help desk try to figure out the issue yourself by visiting the websites listed under number 1 above. See the ‘Getting help with technology’ section on page 9 of this syllabus for more information.

6. What is the University policy on software use?

All faculty, staff and students of the university are required and expected to obey the laws and legal agreements governing software use. Failure to do so can lead to monetary damages and/or criminal penalties for the individual violator. Because such violations are also against university policies and rules, disciplinary action will be taken as appropriate.

7. What if I need special accommodations to take the course?

The UF Disability Resource Center coordinates the needed accommodations of students with disabilities. This includes registering disabilities, recommending academic accommodations within the classroom, accessing special adaptive computer equipment, providing interpretation services and mediating faculty-student disability related issues.

Contact the Disability Resource Center by phone: (325) 392-8565, the UF Gainesville campus, Room 0001 Reid Hall, or online at: https://disability.ufl.edu/.

8. How long will I have to wait for a response from the instructor to my e-mail?

On weekdays, your instructor should respond to emails within 24 hours, but this may not always happen due to meetings and professional obligations. Emails sent on weekends will not be answered until Monday.

9. What will help me succeed in this course?

Strong discipline and desire to succeed: You’ll need to log in to the course Canvas site regularly to check for messages and to participate in discussions. There is a great deal of reading in this course, so you need to make a commitment to completing the assigned readings on a regular basis. Just because there are not regularly scheduled meeting times does not mean you don’t have to devote time to this course. You should expect to have to devote 4-6 hours a week working on this course. Quizzes are scheduled weekly to help ensure that you don’t get behind with course reading assignments.

Ability to work well independently: You’ll develop the support of fellow learners all taking the same coursework together, but it will be different than a typical classroom environment. But you will be required to work well independently.

Below are some Best Practices provided by the UF Help Desk for taking quizzes and exams in Canvas.

- Don’t wait until the last minute. Know when the quiz/exam must be completed and leave yourself plenty of time.
- Make sure you have a dependable internet connection; WIRED rather than wireless if possible.
- Be sure you are using the most recent version of your web browser when logging into Canvas.
- Make sure you read all instructions carefully before beginning the exams.
- If you lose internet connection, or your browser crashes, the timer will continue to count down. Log back in as quickly as possible and resume the test! You may need to click the “Resume Quiz/Exam” button.
- If you encounter any unexpected behavior (error messages, inability to log in, etc..) take a screen shot of the problem (Print Scrn) and paste (CTRL+V) into a program like Word. Save this file. This is important so that your instructor knows your problem is legitimate, and to assist the UF Computing Help Desk in helping you fix the problem.
• If you encounter problems that prevent you from taking an exam, immediately call the UF Computing Help Desk at 352-392-4357. Keep the ticket number for future reference.
• When you are done with an exam, be sure you submit it!

University of Florida Policy Statements

Grades and Grade Points
For information on current UF policies for assigning grade points, see: https://catalog.ufl.edu/ugrad/current/regulations/info/grades.aspx

Absences and Make-Up Work
Requirements for class attendance and make-up exams, assignments and other work are consistent with university policies that can be found at: https://catalog.ufl.edu/UGRD/academic-regulations/attendance-policies/

Course Evaluation Process
Students are expected to provide professional and respectful feedback on the quality of instruction in this course by completing course evaluations online via GatorEvals. Guidance on how to give feedback in a professional and respectful manner is available at https://gatorevals.aa.ufl.edu/students/. Students will be notified when the evaluation period opens, and can complete evaluations through the email they receive from GatorEvals, in their Canvas course menu under GatorEvals, or via https://ufl.bluera.com/ufl/. Summaries of course evaluation results are available to students at https://gatorevals.aa.ufl.edu/public-results/.

Academic Honesty
UF students are bound by The Honor Pledge which states, "We, the members of the University of Florida community, pledge to hold ourselves and our peers to the highest standards of honor and integrity by abiding by the Honor Code. On all work submitted for credit by students at the University of Florida, the following pledge is either required or implied: "On my honor, I have neither given nor received unauthorized aid in doing this assignment." The Honor Code specifies a number of behaviors that are in violation of this code and the possible sanctions. Click here to read the Honor Code. Furthermore, you are obligated to report any condition that facilitates academic misconduct to appropriate personnel. If you have any questions or concerns, please consult with the instructor or TAs in this class.

Software Use
All faculty, staff and students of the university are required and expected to obey the laws and legal agreements governing software use. Failure to do so can lead to monetary damages and/or criminal penalties for the individual violator. Because such violations are also against university policies and rules, disciplinary action will be taken as appropriate.

Campus Resources
Health and Wellness

U Matter, We Care: If you or someone you know is in distress, please contact umatter@ufl.edu, 352-392-1575, or visit U Matter, We Care website to refer or report a concern and a team member will reach out to the student in distress.

Counseling and Wellness Center: Visit the Counseling and Wellness Center website or call 352-392-1575 for information on crisis services as well as non-crisis services.

Student Health Care Center: Call 352-392-1161 for 24/7 information to help you find the care you need, or visit the Student Health Care Center website.

University Police Department: Visit UF Police Department website or call 352-392-1111 (or 9-1-1 for emergencies).

UF Health Shands Emergency Room / Trauma Center: For immediate medical care call 352-733-0111 or go to the emergency room at 1515 SW Archer Road,
Gainesville, FL 32608; Visit the UF Health Emergency Room and Trauma Center website

Academic Resources
E-learning technical support: Contact the UF Computing Help Desk at 352-392-4357 or via e-mail at helpdesk@ufl.edu.

Career Connections Center: Reitz Union Suite 1300, 352-392-1601. Career assistance and counseling services.

Library Support: Various ways to receive assistance with respect to using the libraries or finding resources.

Teaching Center: Broward Hall, 352-392-2010 or to make an appointment 352-392-6420. General study skills and tutoring.

Student Complaints On-Campus: Visit the Student Honor Code and Student Conduct Code webpage for more information.

On-Line Students Complaints: View the Distance Learning Student Complaint Process

Services for Students with Disabilities
Students with disabilities who experience learning barriers and would like to request academic accommodations should connect with the Disability Resource Center. Click here to get started with the Disability Resource Center. It is important for students to share their accommodation letter with their instructor and discuss their access needs, as early as possible in the semester.

Online Course Evaluation Process
Students are expected to provide professional and respectful feedback on the quality of instruction in this course by completing course evaluations online via GatorEvals. Click here for guidance on how to give feedback in a professional and respectful manner. Students will be notified when the evaluation period opens, and can complete evaluations through the email they receive from GatorEvals, in their Canvas course menu under GatorEvals, or via ufl.bluera.com/ufl/. Summaries of course evaluation results are available to students here.
